

Generative AI Declaration

Student Name: Fedor Morgunov

Module: ECM3408 — Enterprise Computing

Statement of AI Usage and Compliance:

This module is AI-supported. That is, it is one where ethical and responsible use of GenAI tools in the development of an assessment is supported. This may include using GenAI tools to summarise literature, improve the structure of your work or quality of English language. All use of GenAI tools should be acknowledged in a statement submitted with their assessment and referenced appropriately. Students are asked to keep a record of the tools, prompts and outputs used so they are able to produce these if necessary at a viva and demonstrate how they have built on this content to ensure the work is original.

In accordance with the above guidance, I hereby declare:

- I have used Generative AI tools (**ChatGPT**) to assist with:
 - Improving the clarity and structure of my written commentary.
 - Checking for grammatical errors or language improvements in the submitted PDF and source code comments.
- I have carefully reviewed, tested, and **significantly edited** all AI-generated suggestions to ensure correctness, alignment with the coursework requirements, and originality. No unverified or unedited AI-generated text was submitted verbatim.
- I affirm that the final submission reflects my personal effort and understanding, and that all sources (including AI tools) have been acknowledged appropriately.
